

Rectification of Hillary Clinton's Chart

by Marcia Starck

Is Hillary going to be our first female president, or not? We know that she could be the Democratic nominee in 2016 and has been the first lady of Arkansas, the first lady of the United States while her husband was president, the first female Senator from NY, and the United States Secretary of State from 2009-2013.

Hillary is known for her acute intelligence, as well as her boundless energy in traveling to so many countries, both as first lady and as Secretary of State. She is also known for her hawkish vote on the Iraq war in 2003 when she was Senator Clinton (for which she has apologized), her many contributions to women and children all over the world, her endurance in staying in a marriage with a husband who was constantly unfaithful. She has not been a favorite of the progressive community with her support of Monsanto and her ties to Wall Street, among other things. She is also known to have an incredible temper and can be difficult to work with.

How do we see this in her horoscope, which I feel is the PM chart rather than the AM chart? (*The AM chart is on this page*) I do not see her as a twelfth house Sun but rather as a fifth house Sun and with a Cancer ascendant ruled by the Moon (women and children's issues). Her Moon in the tenth house seems to fit as well as the conjunction to Eris, her persona as a warrior woman, as well as her temper. She also has a Moon shaped face, which many have remarked on.

I am looking at progressed Moon aspects as well as solar arc directions to and transits to the Moon and angles for some significant dates in her life.

On May 30, 1969, Hillary graduated from Wellesley and gave the commencement speech, which no other student had done. Her speech received a standing ovation for 7 minutes; in it she criticized the speaker before her, Senator Brooke. Her progressed Moon

was 19 Capricorn semi-square to her 5 Pisces MC. Her solar arc ascendant was almost 22 Cancer trine her natal Mercury and semi-sextile Saturn. Her solar arc MC was close to her Moon at 27 Pisces. Transiting URANUS was 29 Virgo OPPOSING HER MOON with transiting Jupiter at 26 Virgo. North node by transit was also at 27 Pisces.

She met Bill Clinton at Harvard when she was 24; her progressed MC came to her Moon by solar arc at that age. Though he proposed 12 times, she did not get married until she was almost 28.

On October 11, 1975, Hillary and Bill were married. Her progressed Moon was conjoined Eris, quite a description of what her marriage would be like! Solar arc ascendant was 28 Cancer trine her Moon while SA Pallas Athena was almost conjoined her Moon, indicating that her role in the marriage was that of the goddess Athena; in fact it was a political partnership. (Athena was born from the head of her father Zeus; she was active in the political

and social sphere.) Transiting Mars (Bill) was 28 Gemini almost on her ascendant while transiting Venus was 4 Virgo conjunct her IC. They had just bought their first house in Arkansas.

Chelsea was born on February 27, 1980 in Arkansas. Hillary's solar arc Moon was exactly conjoined Ceres, referring to child birth, while her SA ascendant was square her Sun, having to incorporate another personality into her own being. Transiting Sun was on her MC while transiting Mars was on her IC, indicating a lot more energy in her home!

In 1993, Hillary became first lady of the United States. When Bill was elected president in November of 1992, her progressed Moon was on her natal Jupiter. Her solar arc ascendant was conjoined her Mars/Pluto conjunction in Leo with the solar arc Moon square that conjunction. This was indicative of the battles she would fight with health care, as well as her needing to testify to the grand jury in 1996 regarding Whitewater.

Her most difficult initiation was in 1998 with the Monica Lewinsky scandal. On the morning of January 21, Bill told her that some news would be appearing in the paper but that it wasn't true. Her progressed Moon that month was 5 degrees Aquarius conjunct progressed Black Moon Lilith, which indicated the dark secrets her husband was keeping. Solar arc ascendant was conjoined Saturn with SA Moon square Saturn. Transiting Mars that day was on Pallas Athena, and her anger the next few days resembled that of the warrior goddess Athena.

When she was elected the first female Senator from New York, on November 7, 2000, her progressed Moon was 8 Pisces close to her MC. Progressed Mars was 5 Virgo on her IC; she had recently bought a house in New York. Solar arc Moon was exactly on her

north node at 23 Taurus, indicating a new direction in life. Transiting Saturn at 7 Virgo was on her IC while Pluto was on her descendant square her Moon; this was a new and independent venture for her without her husband.

Progressed Moon was on her natal Uranus when she was appointed Secretary of State by Obama. She began this job in January 2009. The progressed Moon would soon move into her first house. Her solar arc Moon was also 1 degree of Gemini in 2009. Transiting Pluto was conjoined her 7th house where it will remain for a long time.

On September 11, 2012, the US embassy in Benghazi, Libya was attacked. Ambassador Chris Stevens and three other Americans were killed. It was a major tragedy and records show that Maria Sands, Hillary's assistant,

forwarded e-mails saying that the embassy was under attack.¹ Hillary has had to testify in front of congress re-

Hillary left the State department in 2013 when Obama was sworn in for his second term. She was focusing on taking care of herself, being a grandmother, writing another book, and probably preparing for a 2016 run for the White house.

On April 12 of 2015, Hillary announced her bid for 2016 with a short video that was taped ahead of time. She said her campaign would be a series of trips to individual states meeting with groups of people and discussing their issues. Her opening was a populist message focusing on the economy and needs of various communities. Her progressed ascendant is conjunct Saturn now and her progressed Moon is opposite her natal Moon. She is in her full Moon phase of the Lunation cycle. (This would be true as well in the AM chart.) Mars by solar arc is sextile her natal Saturn, and Pluto by solar arc is inconjunct her Nodes. (This also would be true in the AM chart.) Transits that day were the Sun trine her Saturn and Jupiter on her Mars Pluto conjunction. Jupiter had gone direct a few days before in 12 degrees of Leo.

garding this incident. Her progressed Moon was conjunct Saturn at the time. Transiting Uranus was inconjunct her Sun while Neptune was on her Pallas in the 9th house of foreign affairs and travel. Neptune here indicates some factors that will remain a mystery in terms of: what did she know before hand and what part did she play in this scenario?

Looking ahead to 2016, what does the future hold for Hillary? On November 8, 2016, Her progressed Moon is 20 Libra 45 sextile her natal Saturn. By solar arc, Neptune is 21 Sag. trine natal Saturn (this is also true in the AM chart) and solar arc Venus is on the US Pluto at 27 Capricorn. (Again this is true in the AM chart.) Transits

for November 8 are Pluto at 15 Capricorn still going through her seventh house and inconjunct her Mars/Pluto conjunction. Uranus at 21 Aries will be exactly trine her Saturn. Transiting Saturn will be 15 Sagittarius trine the Mars/Pluto conjunction while transiting Jupiter is conjunct her Neptune at 12 Libra. After debating Bernie Sanders in the democratic primary, it is possible that some of her positions may be more progressive and that she will be more empowered to change the economic disparity in the United States. Perhaps this will be more possible with her solar arc Venus on the United States' Pluto.
